

A Place At Work Program: COVID-19 Screening

A Place At Home™ (APAH) medical professionals have been taking care of people for almost a decade in the In-Home Senior Care industry. We know what it takes to keep people safe, and are trained to recognize symptoms that may jeopardize seniors health. The *A Place At Work* program was developed because now more than ever we need to take those skills into large “at-risk” corporations in our community to prevent massive losses of production, loss of employees, loss of stability, and loss of income.

Our trained Certified Nursing Assistants will be on-site to screen your employees upon entry of the building, or job sites, to ensure the safety of your employees and keep COVID-19 out of your business thus keeping your business in a productive state as opposed to a crisis state and providing peace-of-mind to employees, clients, and upper management.

Monitor High Traffic Times

APAH will assign the same CNA during the highest employee traffic times going in and out of your building or job site. This could be shift changes, lunch breaks, meetings, job sites and any high traffic areas to prevent the spread of COVID-19 and avoid closures.

Conduct CARE Screening

APAH CNA will perform temperature checks and keep a log of all screening questions for every employee. In addition, they are there to ensure compliance of your company policies. Are they wearing the proper personal protective equipment (PPE), and safety equipment, to enter the premises? We will log all incidents and immediately notify the direct contact of any employee being sent home so that we can prevent the spread of COVID-19 in your business. Light sanitizing of door knobs and other high contact areas will also be provided.

The Value of Safety

APAH CNA's are \$50/hr. That includes one professional CNA and all materials required to screen for symptoms of employees.

REOPEN SAFELY AND STAY OPEN: Let our professionals take CARE of your professionals and protect the health and safety of your business.
